First Aid Training alongside the NHS
Apr 2018

First Aid Training alongside the British Heart Foundation
Mar 2019

Electrician Course
Apr 2019

10 GCSE 9-6 GRADES
2017 - 2022

Sound Engineering for Live Performances Course
2021 - 2022

SKILLS

- Problem Solving
- Time Management
- Music: Piano (Grade 2)
- Music: Drums (Grade 5)
- Music: Technology & Production
- Attention to Detail
- Proficient in amateur level karting & Simulation Racing
- Programming: C#
- Programming: HTML
- 3D Simulation, Modelling and Rendering

WORK EXPERIENCES

Volunteer Work: Aik Saath Charity in South West London
July 2022

I provided assistance in raising money for the non-profit organisation, Aik Saath, as well as providing physical support by helping the staff make minor renovations to their office. During the time spent there, I contributed towards the production of a sponsorship campaign which was presented to four potential sponsors, who, combined, donated the total asking fee.

Volunteer Work: Audio Engineering
March 2022 - July 2023

I provided assistance during after-school hours in the first double cast production at my secondary school. Work included working with new audio equipment and instructing others on how to use and maintain said equipment, managing a smaller team of light engineers and live mixing, EQing and audio balancing performers throughout the multiple shows (two performances for school, two for public).

Event Hosting Within School
March 2019 - May 2023

Since 2019 I have hosted an international event, with a number of other students, in which Apple and Microsoft representatives from abroad come to visit our school to see how we use technology in education. Part of the experience involves guiding and catering for the guests as well as being on hand for any questions or queries they may have. The other part involves delivering a presentation regarding technology within an educational environment, precise and clear communication skills are required as not all guests have the same proficiency in speaking English.
